Subject: Chat with Kenneth Lipp
From: Kenneth Lipp <kenneth.lipp@gmail.com>
To: barriticus@gmail.com

me: Howdy, Kenneth
me: I'll definitely get back to you with some more info on the schematic, I just got busy with this R.S. McCain incident.
Kenneth: Not a bit, no hurry, nor not necessarily any relevance. Get a chance, google "personal brain software"--follow to PersonalBrain
me: will do, that actually sounds very interesting
Kenneth: Supposed to be a personal mneumonic device, cognitive streamiliner. I found that it was effective at diverting my atten tio wholly from pursuing onfo to organizing it,Del'd. Might be an interesting analogue, though
me: yes, but I really have been looking for an advanced sort of organizational utility of this exact sort, so I'm definitely going to download it now and check it out
